Variable Description: name by which the person is most often credited (string)

Data Type: VARCHAR(128)

####

Variable Name: name_basics_primaryprofession

Variable Description: the top-3 professions of the person (array of strings)

Data Type: VARCHAR(128)

####

Variable Name: title_akas_attributes

Variable Description: Additional terms to describe this alternative title (array), not enumerated

Data Type: VARCHAR(512)

####

Variable Name: title_akas_isoriginaltitle

Variable Description: 0: not original title. 1: original title (boolean)

Data Type: VARCHAR(45)

####

Variable Name: title_akas_language

Variable Description: the language of the title (string)

Data Type: VARCHAR(128)

####

Variable Name: title_akas_ordering

Variable Description: a number to uniquely identify rows for a given titleId (integer)

Data Type: VARCHAR(128)

####

Variable Name: title_akas_region

Variable Description: the region for this version of the title (string)

Data Type: VARCHAR(128)

####

Variable Name: title_akas_title

Variable Description: the localized title (string)

Data Type: TEXT

####

Variable Name: title_akas_titleid

Variable Description: a tconst (string, an alphanumeric unique identifier of the title)

Data Type: VARCHAR(128)

####

Variable Name: title_akas_types

Variable Description: Enumerated set of attributes for this alternative title (array). One or more of the following: "alternative", "dvd", "festival", "tv", "video", "working", "original", "imdbDisplay". New values may be added in the future without warning

Data Type: VARCHAR(512)

####

Variable Name: title_basics_endyear

Variable Description: TV Series end year (YYYY). 'N' for all other title types

Data Type: VARCHAR(45)

####

Variable Name: title_basics_genres

Variable Description: includes up to three genres associated with the title (string array)

Data Type: VARCHAR(256)

####

Variable Name: title_basics_isadult

Variable Description: 0: non-adult title. 1: adult title (boolean)

Data Type: VARCHAR(32)

####

Variable Name: title_basics_originaltitle

Variable Description: original title (string) (in the original language)

Data Type: VARCHAR(512)

####

Variable Name: title_basics_primarytitle

Variable Description: the more popular title (string) (the title used by the filmmakers on promotional materials at the point of release)

Data Type: VARCHAR(512)

####

Variable Name: title_basics_runtimeinminutes

Variable Description: primary runtime of the title (integer, in minutes)

Data Type: VARCHAR(45)

####

Variable Name: title_basics_startyear

Variable Description: represents the release year of a title (YYYY). In the case of TV Series, it is the series start year

Data Type: VARCHAR(45)

####

Variable Name: title_basics_tconst

Variable Description: alphanumeric unique identifier of the title (string)

Data Type: VARCHAR(64)

####

Variable Name: title_basics_titletype

Variable Description: the type/format of the title (string) (e.g. movie, short, tvseries, tvepisode, video, etc)

Data Type: VARCHAR(64)

####

Variable Description: director(s) of the given title (array of nconsts)

Data Type: TEXT

####

Variable Name: title_crew_tconst

Variable Description: alphanumeric unique identifier of the title (string)

Data Type: VARCHAR(128)

####

Variable Name: title_crew_writers

Variable Description: writer(s) of the given title (array of nconsts)

Data Type: TEXT

####

Variable Name: title_episode_episodenumber

Variable Description: episode number of the tconst in the TV series (integer)

Data Type: TEXT

####

Variable Name: title_episode_parenttconst

Variable Description: alphanumeric identifier of the parent TV Series (string)

Data Type: VARCHAR(128)

####

Variable Name: title_episode_seasonnumber

Variable Description: season number the episode belongs to (integer)

Data Type: TEXT

####

Variable Name: title_episode_tconst

Variable Description: alphanumeric identifier of episode (string)

Data Type: VARCHAR(128)

####

Variable Name: title_principals_category

Variable Description: the category of job that person was in (string)

Data Type: TEXT

####

Variable Name: title_principals_characters

Variable Description: the name of the character played if applicable, else

Data Type: TEXT

####

Variable Name: title_principals_job

Variable Description: the specific job title if applicable, else

Data Type: TEXT

####

Variable Name: title_principals_nconst

Variable Description: alphanumeric unique identifier of the name/person (string)

Data Type: VARCHAR(128)

####

Variable Name: title_principals_ordering

Variable Description: a number to uniquely identify rows for a given titleId (integer)

Data Type: VARCHAR(45)

####

Variable Name: title_principals_tconst

Variable Description: alphanumeric unique identifier of the title (string)

Data Type: VARCHAR(128)

####

Variable Name: title_ratings_averagerating

Variable Description: weighted average of all the individual user ratings (float)

Data Type: VARCHAR(45)

####

Variable Name: title_ratings_numvotes

Variable Description: number of votes the title has received (integer)

Data Type: VARCHAR(45)

###

Variable Name: title_ratings_tconst

Variable Description: alphanumeric unique identifier of the title (string)

Data Type: VARCHAR(128)

###
